**DETAILED ACTION**

1. Claims 1-5, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cetrelli in view of AAPA as discussed in paragraph 5 of the last office action.
2. Applicant's arguments filed 12/31/01 have been fully considered but they are not persuasive.

In response to applicant's argument regarding element 7 of Cetrelli discloses that element 7 provides good ventilation (col 4 lines 35+). Furthermore, Cetrelli does disclose that the holes/apertures may be formed for ventilation purposes (col 4 lines 35+). So, this reads on the claims as they stand. The holes/apertures are a matter of adjustability as is the shape of the depression/aperture.

Σ 2

(Col. 3 lines 65+)

In response to the combination of the references, Cetrelli does disclose using a roller with surfaces to form depressions 7. However, the exact roller structure is not being shown but the roller and anvil structure of applicant's admitted prior art in figure 1 shows the well known structure. It would have been obvious to provide Cetrelli with the roller and anvil structure of AAPA as is known in the art.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
